## Personal Profile

An **undergraduate student** at the **Pennsylvania State University**, studying **B.S. Computer Science**. Currently seeking to attain an internship role in **Software Engineering**. Efficient software developer with a keen attention to detail.

## Education

### The Pennsylvania State University

B.S. Computer Science

- Cumulative GPA: 3.43
- Computer Science GPA: 3.74
- Involved in NDL (Nittany Data Labs), ACM PSU

University Park, PA

Aug 2021 - May 2025

### Asian International Private School

High School

- Passed XII<sup>th</sup> from CBSE Board (95.6%, June 2021)
- Passed X<sup>th</sup> from CBSE Board (94.6%, May 2019)
- Specialized in Math, Physics, Chemistry and Computer Science

Al Dhannah, U.A.E

Apr 2017 - Jun 2021

## Skills

**Programming** Python (Pandas, NumPy), C, HTML/CSS, SQL.

**Miscellaneous** Microsoft Office (Excel, Word, PowerPoint), Git.

**Soft Skills** Time Management, Teamwork, Problem-solving.

**Languages** English (Bilingual Proficiency), Tamil (Native Proficiency), Hindi (Professional Proficiency)

## Achievements

### Ambassador

Emirates Foundation's Think Science Competition

- **Ambassador** for the nationwide competition '**Think Science**' hosted by Emirates Foundation in the U.A.E, where only around **600 teams** are selected from around 4000.
- Selected for one of my projects on **Eddy Current Braking System**.

## Projects

### Exploratory Data Analysis of the Spotify Dataset | GitHub

- Analyzed the Spotify dataset that contains data from the years 2000-2019 totaling up to 2000 rows.
- Used Pandas to clean data and create new data frames to aid for visualizations.
- Used Matplotlib alongside the Seaborn wrapper to visualize data.
- **Technical Skills:** Python with Pandas, Matplotlib, Seaborn.

### School Library Management System | GitHub

- Used Object Oriented Concepts to create a management system.
- Interfaced Python with MySQL with the mysql.connector module.
- Used Python to interact with text files to store summary of the books.
- **Technical Skills:** Python, SQL

### Photo Water Marker | GitHub

- Used computer vision library OpenCV to watermark photographs.
- Used NumPy for transforming the watermark image.
- **Technical Skills:** Python

## Work Experience

### Pennsylvania State University

West Food Market Employee

University Park, PA

Oct 2021 - Dec 2021
